y2
92. (Amended) The composition of Claim 84, wherein said naturally occurring cancer antigen is a cell-surface protein or peptide.

y3
95. (Amended four times) A composition comprising infectious Venezuelan Equine Encephalitis (VEE) particles in an immunogenically effective amount to prevent or treat cancer, wherein said VEE particles comprise one or more heterologous nucleotide sequences encoding a naturally occurring cancer cell antigen; and wherein said VEE particles infect antigen-presenting cells, and further wherein said VEE particles comprise one or more attenuating mutations.

y4
100. (Amended) The composition of Claim 95, wherein said naturally occurring cancer antigen is selected from the group consisting of a helper T cell epitope, a cytotoxic T cell epitope, a T-dependent B cell epitope, and a T-independent B cell epitope.

101. (Amended) The composition of Claim 95, wherein said naturally occurring cancer antigen is a cell-surface protein or peptide.

y5
105. (Amended) A composition comprising infectious alphavirus replicon particles in an immunogenically effective amount to prevent or treat cancer, wherein said alphavirus particles comprise one or more heterologous nucleotide sequences encoding a naturally occurring cancer cell antigen, and wherein said alphavirus particles infect antigen-presenting cells.
